

the end of summer

this week's reflection is about endings and beginnings. i've intentionally made this week's post fairly simple to allow for the photos to sorta show for themselves. the majority of the time i spent this summer was in reston which is in northern virginia, without a job and mostly nothing to do. essentially my one goal this summer was to find something to do.

and generally speaking, i seem to have accomplished it.

nikon digital
50mm
@mstrodl

cinestill 400d
minolta xg-7 / 24mm
@stella

my girlfriends took these photos :)

cinestill 400d
reflekta TLR

efke infrared
minolta xg-9 / 50mm

cinestill 400d
reflekta TLR
panorama / 6 panels

efke IR
minolta xg-9 / 50mm
panorama / 12 panels

this week's weather was significantly cooler. there's starting to be a chill in the air, and september is almost here. the end of summer means the beginning of fall, which is a sort of in-between season that i really enjoy. some of my favorite events happen in early september, like apple picking, fall camping, and more leitchworth runs to go see the changing leaves.

you'll probably see more of these newsletters in the gallery format (or at least a gallery section) since i'm taking a film photography class this semester, and we shoot a roll every week.

please tell me what you liked about this newsletter and the previous ones too, i like getting feedback and hearing from you.

thanks for looking this week :)

last week's notable links

nothing super interesting this week...
